of business ✦***

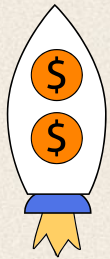

01

What is POA?

Concept of POA

What is POA?

POA is a course of study that provides the basic introduction to principles and techniques that accountants employ in:

- Recording *(How do accountants record what happens in business?)*
- Reporting *(How do you share what you have recorded to your boss?)*
- Analysing and interpreting business transactions *(How do you share and filter important information to your boss?)*
- Preparing reports for management *(How do you know the business is making a profit or loss?)*

Accountants

What my friends think I do

What my mom thinks I do

What society thinks I do.

What my boss thinks I do.

What I think I do.

What I actually do.

Conclusion

POA relates to the business world
which most of you are not familiar
with.

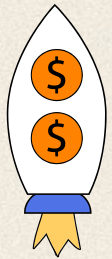

02

Content of POA

What will you be learning?

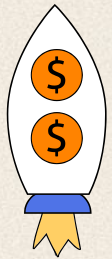

Assessment for POA

1. There is no practical work (100% paper-based exam)
2. 2 papers for examination
 - Paper 1 **(1 hour)**
 - Paper 2 **(2 hours)**
3. 25% theory in exam

What will we be doing in POA?

1. Perform the role of an accountant – preparing documents, how to record documents, how to present documents
2. Theories to memorize on why do we need to do all these roles.
3. Basic calculations involved ('+', '-', 'x', '÷')

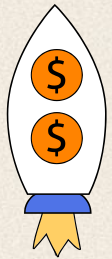

03

How to score in POA?

Tips and advices before applying for POA

What must I do to perform well?

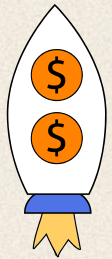

1) Work consistently right from the beginning in Sec 3.

- You need to build a strong foundation in the basics in Sec 3.
- Last-ditch effort in Sec 4 will be too late.

2) Be very attentive in class as POA is a new subject

- Don't be shy to ask questions when in doubt or do not understand
(FYI: Your POA teacher would love to answer questions 😊)

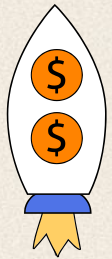

What must I do to perform well?

3) Diligent in doing homework (HW)

- Just like Maths, POA requires much practice (Practice makes perfect 😊)
- Not doing homework regularly is a **confirm** way to fail.

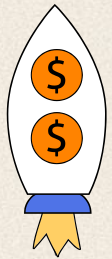

What must I do to perform well?

4) Regular attendance

- POA topics are connected. If you are often absent or if you don't understand one topic, you will likely feel 'lost' and cannot follow subsequent lessons
- So should you be absent, you need to catch up on lessons missed or those that you don't understand immediately

Conclusion

Please check with your POA teacher for lessons missed in order to catch up.

The subject should be fun for those who like to work with numbers as they are likely to do well in the subject.

Any questions?
